Summary:

Nancy Fields is requesting consideration of a Preliminary Plat for the property located at 4768 S 1175 W for approximately 0.72 acre. The applicant is proposing a two-lot subdivision. The applicant received final plat approval in 2017 for this proposed subdivision but did not record the approved plat within the approval timeframe.

The property is zoned R-1-10 with a minimum 10,000 square foot lot size. The proposed plat intends to have two (2) lots varying in size from 10,263 square feet to 21,139 square feet. The proposed subdivision has one lot with an existing single-family home on it and one proposed lot to the south. To meet code requirements, the lot sizes must be at least 80' wide. The minimum home size required is 1,200 square feet for a one-story home or 1,875 for a two-story home. The setbacks for the R-1-10 zone are as follows:

Front Yard	Side Yard	Side Yard Combined	Rear Yard
25 feet	5 feet	16 feet	15 feet

As proposed the subdivision meets the set-back requirements for the R-1-10 zone.

A few modifications/additions will be required for Final Plat approval, these include the following items including compliance with all applicable code requirements:

- An amendment to the original subdivision plat.
- Legal descriptions need to be correct and consistent throughout the plat.
- A Stormwater Agreement is needed
- A bond is needed for improvements in the right of way
- Hydrants, street lights, and drive-ways need to be added to the site plan.
- A Title Report less than 90 days old is submitted.
- A stipulation needs to be added to the plat that parking is not allowed on the shared access easement.
